## SECTION 3: HAZARDS IDENTIFICATION

### EMERGENCY OVERVIEW:

Not dangerous with normal use. The battery should not be disassembled or incinerated. Exposure to the ingredients contained within or their combustion products could be harmful.

APPEARANCE, COLOR, and ODOR: Solid object, no odor.

### ROUTES OF ENTRY:

Risk of exposure will only occur if the battery cell is mechanically, thermally, or electrically abused and the enclosure is compromised. If this occurs, exposure to electrolyte solutions contained within the battery cell may occur by inhalation, eye contact, skin contact and ingestion.

### POTENTIAL HEALTH EFFECTS:

EYES: Contact between the battery and eye will not cause any harm. Eye contact with the contents of a ruptured battery can cause severe irritation to the eye.

SKIN: Contact between the battery and skin will not cause any harm. Skin contact with positive and negative terminals of high voltages may cause burns to the skin. Skin contact with a ruptured battery can cause skin irritation.

INGESTION: Swallowing of material from a sealed battery is not an expected route of exposure. Swallowing mists from a ruptured battery may cause respiratory irritation, chemical burns of the mouth and gastrointestinal tract irritation.

INHALATION: Inhalation of material from a sealed battery is not an expected route of exposure. Vapors or mists from a ruptured battery may cause respiratory irritation.

#### SECTION 4: FIRST AID MEASURES

EYES: Wash affected eye with lukewarm water for at least 30 minutes. Rinse with saline solution if possible. Seek medical attention. SKIN: Wash affected area with lukewarm water for at least 30 minutes. If irritation or pain persists, seek medical attention.

INGESTION: Move victim to fresh air and remove source of contamination from area. Seek medical attention.

INHALATION: Move victim to fresh air and remove source of contamination from area. Seek medical attention.

CAUTION: In all cases if irritation persists, seek medical assistance at once.

#### SECTION 5: FIRE-FIGHTING MEASURES

EXTINGUISHING MEDIA: Water, carbon dioxide, dry chemical powder and foam are most effective means to extinguish a battery fire

FIRE FIGHTING PROCEDURE: Put on fully protective gear, including self-contained breathing apparatus, goggles, fireproofing jacket and gloves.

UNUSUAL FIRE AND EXPLOSION HAZARDS: Exposing battery cell to excessive heat, fire or over voltage condition may cause a leak, fire, hazardous vapors and hazardous decomposition products. Damaged or opened cells or batteries can result in rapid heating and the release of flammable vapors.

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

##### ACCIDENTAL RELEASE MEASURES:

The material contained within the batteries cells is only expelled under abusive conditions. Use a shovel and cover battery with sand or vermiculite, place in an approved container and dispose in accordance with section 13.

## SECTION 7: HANDLING AND STORAGE

**HANDLING:** Do not expose battery or cell to extreme temperatures or fire. Do not disassemble, crush or puncture battery.

**STORAGE:** Insulate positive and negative terminals to avoid short circuit. Store in a cool and well ventilated area and avoid direct sunlight. Elevated temperatures can result in reduced battery life.

## SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

**RESPIRATORY PROTECTION:** Not necessary under normal use. In case of battery or cell rupture, use a self-contained full face respiratory mask.

**EYE PROTECTION:** Not necessary under normal use. Wear safety goggles if handling a ruptured or leaking battery cell.

**HAND PROTECTION:** Not necessary under normal use. Wear Viton rubber gloves if handling a ruptured or leaking battery cell.

**SKIN PROTECTION:** Not necessary under normal use. Wear rubber apron and Viton rubber gloves if handling a ruptured or leaking battery cell.
